JEE 2026 RESULTS

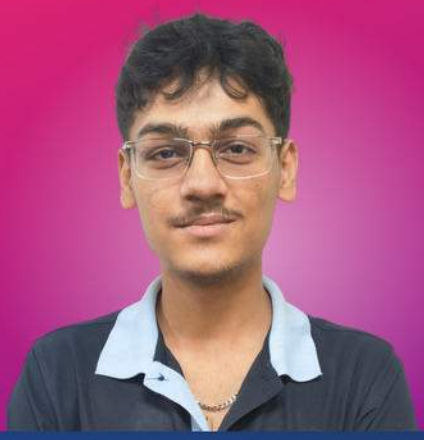

OUR TOPPERS

When talent meets the right guidance.

Saksham Bishnoi and Sulokya Bibhuty - our JEE 2026 toppers from Zigyan, Sector 16 - with the programme they took and the rank they earned.

Rahul Kaushik Sir
Founder & Director, Zigyan Eduvision
23 years of teaching

Saksham Bishnoi

4 YEARS CLASSROOM

JEE ADVANCED 2026	JEE MAIN 2026
AIR 168	AIR 811
	99.95 percentile

Sulokya Bibhuty

3 YEARS CLASSROOM

JEE ADVANCED 2026	JEE MAIN 2026
AIR 1,315	AIR 1,095
	99.94 percentile

OLYMPIAD RESULTS

Above the Minimum Admissible Score - the national band for the subject

CHEMISTRY

- Sulokya Bibhuty — 3 Years Classroom
- Anay Gupta — 3 Years Classroom
- Akshat Khator — 3 Years Classroom
- Harshit Goyal — 4 Years Classroom
- Hardik Sharma — 3 Years Classroom
- Aarush Kumar — 1 Year Classroom

PHYSICS

- Sulokya Bibhuty — 3 Years Classroom
- Saksham Bishnoi — 4 Years Classroom

ASTRONOMY

- Sulokya Bibhuty — 3 Years Classroom

MATHEMATICS (IOQM)

- Priyanshi — 4 Years Classroom

Saksham Bishnoi qualified the Chemistry Olympiad twice and was selected for the Orientation-cum-Selection Camp at HBCSE, Mumbai.

16 selections in JEE Advanced 2026

16 of 35 students of the batch selected

AIR 168 best JEE Advanced rank

Start where they started.

PART – 1 : PHYSICS

Single Correct MCQ • Q. 1 – 15 • Maximum Marks : 60

1. **Assertion (A):** An object at rest has no force acting on it.

   Reason (R): A force can make an object at rest start moving.

   (1) Both Assertion (A) and Reason (R) are true, and R is the correct explanation of A.

   (2) Both Assertion (A) and Reason (R) are true, but R is NOT the correct explanation of A.

   (3) Assertion (A) is true, but Reason (R) is false.

   (4) Assertion (A) is false, but Reason (R) is true.

2. In the figure, the upper face of the fixed magnet A is a North pole. Magnets B and C float above it. The lower face of magnet C (facing B) must be:

   (1) North pole

   (2) either pole

   (3) C cannot float in any arrangement

   (4) South pole

3. The figure shows the scale of a spring balance with an object hung from it. What is the reading, and what is the mass of the object (on the Earth g = 10m/s^2)?

   (1) 6.2 N and 620 g

   (2) 6.4 N and 640 g

   (3) 6.4 N and 64 g

   (4) 6.8 N and 680 g

4. Two electromagnets are set up as shown. Compass 1 is near end A, with its north end pointing towards A. Compass 2 is near end D, with its north end pointing away from D. If the electromagnets are brought closer so that end B faces end C, they will:

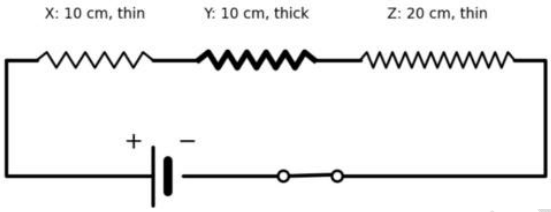

(1) attract each other, because B is a north pole and C is a south pole

(2) repel each other, because B and C are both north poles

(3) attract each other, because B and C are both south poles

(4) neither attract nor repel, because electromagnets do not exert forces on each other

5. Three nichrome wires X, Y and Z are joined one after the other, as shown. Arrange them in DECREASING order of the heat produced in 30 s.

(1) X > Y > Z (2) Z > X > Y (3) Y > X > Z

(4) X = Y = Z, because the same current flows through all

6. A cell is made by dipping TWO COPPER strips into lemon juice and connecting them to an LED. What happens?

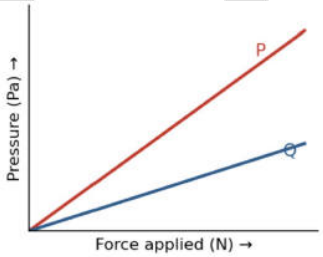

(1) The LED glows brightly

(2) No useful current is produced because the electrodes must be of different metals

(3) The LED glows only in sunlight

(4) The LED glows if it is reversed

7. The graph shows pressure against applied force for two surfaces P and Q. What can you conclude?

(1) The area of surface P is smaller than that of surface Q

(2) The area of surface P is larger than that of surface Q

(3) Both surfaces have equal area

(4) Pressure on P does not depend on force

8. When you suck on a straw to drink juice, the juice rises in the straw because:

(1) sucking creates a pulling force that lifts the juice

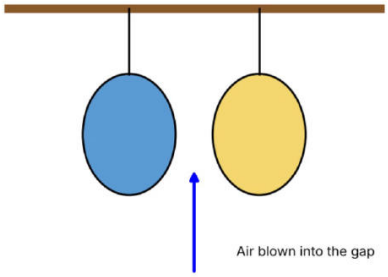

(2) the juice becomes lighter

(3) sucking lowers the air pressure in the straw, and the higher air pressure on the juice surface pushes the juice up

(4) air pressure on the juice surface decreases

9. **Assertion (A):** When air is blown between two balloons hanging close together, they move towards each other.

Reason (R): High-speed winds are accompanied by reduced air pressure.

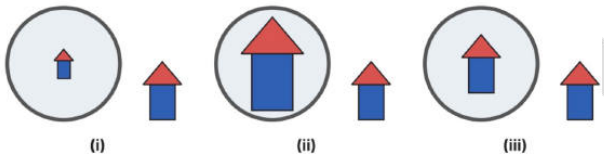

(1) Both A and R are true, and R is the correct explanation of A.

(2) Both A and R are true, but R is NOT the correct explanation of A.

(3) A is true, but R is false

(4) A is false, but R is true

10. The same toy is kept at the same small distance in front of three different mirrors. The images seen are shown in (i), (ii) and (iii). The mirrors are, respectively:

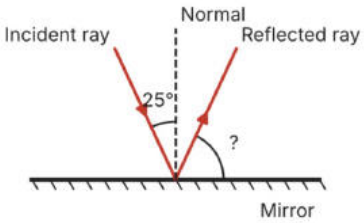

(1) plane, convex, concave

(2) convex, concave, plane

(3) concave, convex, plane

(4) convex, plane, concave

11. In the figure, the angle of incidence is 25°. The angle marked '?' between the reflected ray and the mirror is:

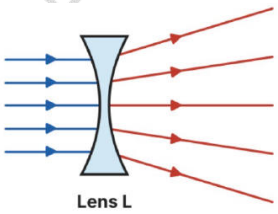

(1) 65°

(2) 25°

(3) 50°

(4) 75°

12. Parallel beams pass through lens L as shown. If a small object is viewed through this lens, it will appear:

(1) erect and enlarged when close, inverted when far

(2) inverted and enlarged

(3) always erect and diminished

(4) always of the same size as the object

13. Which feature of the image is common to plane, concave and convex mirrors?

(1) The image is always of the same size as the object

(2) The image is always erect

(3) The image is always diminished

(4) Lateral inversion is seen in the image

14. On Amavasya (new Moon day) the Moon is not visible because

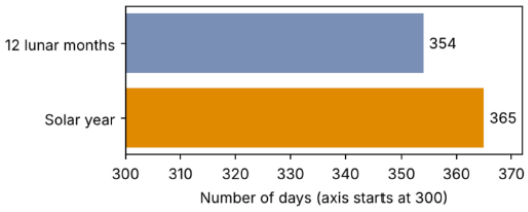

(1) the Moon stops reflecting sunlight

(2) the Earth's shadow covers the Moon

(3) the Moon goes very far from the Earth

(4) only the non-illuminated portion of the Moon faces the Earth

15. Use the chart. After three years, the total by which 12-lunar-month years fall behind solar years is closest to

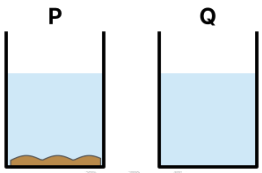

(1) 11 days (2) one week (3) one month (4) one year

PART – 2 : CHEMISTRY

Single Correct MCQ • Q. 16 – 30 • Maximum Marks : 60

16. Two glasses P and Q contain equal amounts of water. One spoonful of a different solid was added to each glass and stirred well. The glasses then looked as shown. Which conclusion is correct?

(1) P contains a solution, while Q contains a non-uniform mixture

(2) Q contains a uniform mixture, while P contains a non-uniform mixture

(3) Both P and Q contain solutions

(4) Both P and Q contain non-uniform mixtures

17. Every sip of a well-prepared ORS tastes the same, whether it is taken from the top or from the bottom of the glass. This is because

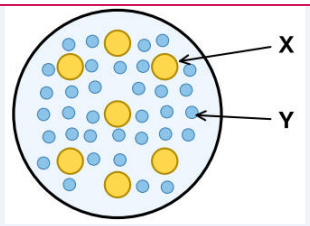

(1) sugar and salt settle at the bottom of the glass

(2) sugar and salt are evenly distributed throughout the water

(3) sugar and salt float near the surface of the water

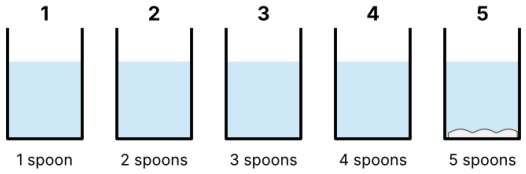

(4) water hides the taste of salt and sugar

18. The figure shows a magnified schematic picture of a solution of a solid in a liquid. What do X and Y represent?

(1) X is the solvent and Y is the solute
(2) X and Y are both solute particles
(3) X is the solute and Y is the solvent
(4) X is the solution and Y is the solute

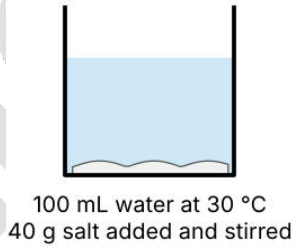

19. Five glasses contain equal amounts of water at the same temperature. Salt was added as shown and stirred well. In which glass is the solution certainly saturated?

Equal amounts of water at the same temperature; salt added and stirred well

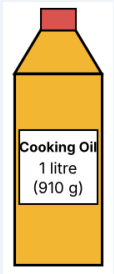

(1) Glass 1
(2) Glass 5
(3) Glass 3
(4) Glass 4

20. 40 g of a salt was added to 100 mL of water at 30 °C and stirred for a long time. Some salt remained undissolved as shown. On separating and drying, the undissolved salt was found to be 4 g. What is the solubility of the salt at 30 °C?

(1) 40 g per 100 mL of water
(2) 4 g per 100 mL of water
(3) 44 g per 100 mL of water
(4) 36 g per 100 mL of water

21. The label on a bottle of cooking oil is shown. What does it tell us about the oil?

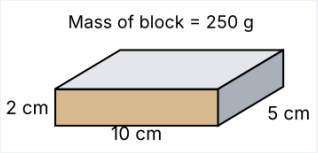

(1) Its density is 1.1 g/mL, which is more than that of water
(2) Its density is 0.91 g/mL, which is less than that of water
(3) Its density is 910 g/mL, which is more than that of water
(4) Its density is the same as that of water

22. An object has a mass of 150 g and its material has a density of 3 g/cm³. What is its volume?

(1) 50 cm³ (2) 450 cm³ (3) 0.02 cm³ (4) 147 cm³

23. Using the measurements shown, find the density of the cuboid block.

(1) 2.5 g/cm³ (2) 0.4 g/cm³ (3) 25 g/cm³ (4) 14.7 g/cm³

24. The pressure on a fixed mass of a gas is increased. What happens?

(1) Its volume decreases and its density increases

(2) Its volume increases and its density decreases

(3) Its volume and density both decrease

(4) Its volume and density remain unchanged

25. **Assertion (A):** Air can be regarded as a solution.

Reason (R): The gases present in the atmosphere form a uniform mixture.

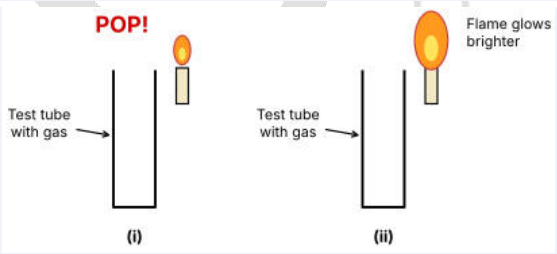

(1) Both A and R are true, and R is the correct explanation of A.

(2) Both A and R are true, but R is not the correct explanation of A.

(3) A is true, but R is false.

(4) A is false, but R is true.

26. The gases collected from water were tested as shown. Identify the gas in each test tube.

(1) (i) hydrogen; (ii) oxygen (2) (i) oxygen; (ii) hydrogen

(3) (i) hydrogen; (ii) water vapour (4) (i) carbon dioxide; (ii) oxygen

27. Why can the gases collected over the battery terminals NOT be water vapour?

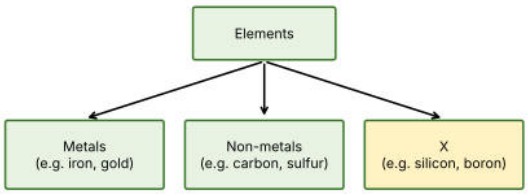

(1) Water vapour is coloured

(2) Water vapour would have condensed back to form water

(3) Water vapour cannot form bubbles

(4) Water vapour is heavier than water

28. In the classification shown, the group marked X is

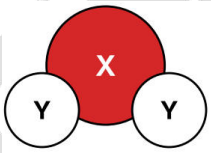

(1) alloys (2) metalloids (3) minerals (4) compounds

29. Which set contains only non-metals?

(1) Carbon, sulfur, iron (2) Gold, silver, magnesium

(3) Oxygen, aluminium, hydrogen (4) Carbon, sulfur, hydrogen

30. The diagram shows one molecule of water. Which statement is correct?

(1) X is hydrogen and the ratio X : Y is 2 : 1 (2) X is oxygen and the ratio X : Y is 2 : 1

(3) X is hydrogen and the ratio X : Y is 1 : 2 (4) X is oxygen and the ratio X : Y is 1 : 2

PART – 3 : BIOLOGY

Single Correct MCQ • Q. 31 – 45 • Maximum Marks : 60

31. A pond receives fertiliser-rich runoff from nearby agricultural fields. Soon, algal growth increases considerably, followed by the death of several fish. What is the most likely explanation?

(1) Excess nutrients promote algal growth, and decomposition can deplete dissolved oxygen.

(2) Fertilisers directly remove all oxygen from the pond.

(3) Algae permanently increase dissolved oxygen under all conditions.

(4) Fish die because algae absorb nitrogen directly from the fish.

32. A student observes cells under a microscope. They possess a cell wall, cell membrane, cytoplasm and a distinct nucleus. Which additional observation most strongly supports their identification as typical plant cells?

(1) Presence of ribosomes (2) Presence of mitochondria

(3) Presence of a large central vacuole (4) Presence of a cell membrane

33. A farmer grows pea plants before cultivating wheat. The wheat crop grows well despite the use of less nitrogen fertiliser. Which explanation best accounts for this?

(1) Pea plants absorb nitrogen directly from sunlight

(2) Pea leaves release nitrogen fertiliser into the air

(3) Pea roots convert atmospheric oxygen into nitrogen

(4) Bacteria associated with pea root nodules help fix atmospheric nitrogen

34. Which sequence correctly represents the movement of water from the soil to the atmosphere through a plant?

(1) Stomata → phloem → root hairs → atmosphere

(2) Root hairs → xylem → leaf tissues → stomata

(3) Xylem → root hairs → stomata → leaf tissues

(4) Phloem → xylem → root hairs → atmosphere

35. A student claims that plants do not need respiration because they prepare their own food. Which statement correctly evaluates this claim?

(1) Both plants and animals respire to release energy from food.

(2) Plants respire only at night, whereas animals respire only during the day

(3) Only the green parts of plants carry out respiration.

(4) Plants photosynthesise but do not require energy from respiration.

36. In a grassland ecosystem, grass is eaten by grasshoppers, grasshoppers by frogs, and frogs by snakes. If the frog population falls sharply, what is the most likely initial effect?

(1) Grasshopper numbers must immediately become zero

(2) Grass production will immediately double

(3) Snakes will begin feeding directly on grass

(4) Grasshopper numbers may increase, putting greater grazing pressure on grass

37. A person chews a piece of bread for a long time and notices a slightly sweet taste. Which process explains this observation?

(1) Pepsin converts proteins into glucose in the mouth

(2) Salivary amylase begins breaking down starch into simpler sugars

(3) Bile breaks down starch before food reaches the stomach

(4) Hydrochloric acid converts starch into amino acids in the mouth

38. A single-celled organism divides into two daughter cells. Which statement best describes this process?

(1) It is sexual reproduction because two cells are formed

(2) It requires the fusion of male and female gametes

(3) It is asexual reproduction that can increase the number of organisms

(4) It occurs only in multicellular organisms

39. A student places equal amounts of cooked rice in two containers. One is clean and covered; the other is exposed to contamination and stored in warm, humid conditions. Why is the second container more likely to spoil?

(1) Warmth, moisture and contamination can promote microbial multiplication

(2) Cooked rice automatically becomes poisonous when exposed to air

(3) Humidity prevents microorganisms from absorbing nutrients

(4) Microorganisms grow only on uncovered food because it contains more oxygen

40. A green aquatic plant releases bubbles when exposed to sunlight. The rate of bubble production increases as light intensity rises, up to a certain point. What conclusion is best supported?

(1) Light has no relationship with photosynthesis

(2) The plant obtains all its food directly from water

(3) The plant releases only carbon dioxide through respiration

(4) Light intensity can affect the rate of photosynthesis, within limiting conditions

41. A forest is cleared to create agricultural land. Which combination of consequences is most scientifically reasonable?

(1) Increased biodiversity, reduced erosion and stable food chains

(2) Habitat loss, possible soil erosion and disruption of food chains

(3) No habitat changes because crops replace every forest species

(4) Improved soil protection and complete prevention of flooding

42. A sealed packet of moist bread develops mould faster than properly dried bread stored under otherwise similar conditions. What is the main reason?

(1) Dry bread contains no organic nutrients

(2) Mould requires direct sunlight to grow

(3) Moisture favours fungal growth and reproduction

(4) Water prevents microorganisms from absorbing nutrients

43. Which statement correctly distinguishes antibiotics from vaccines?

(1) Both always kill viruses directly after entering the body.

(2) Vaccines treat every active bacterial infection immediately.

(3) Antibiotics and vaccines work through exactly the same mechanism.

(4) Antibiotics act against susceptible bacteria, while vaccines help develop specific immune protection.

44. A plant is kept in darkness for 48 hours and then one of its leaves is exposed to sunlight while the rest of the plant remains covered. After the iodine test, which result is most likely?

(1) The sun-exposed region develops a blue-black colour.

(2) The entire leaf turns blue-black immediately.

(3) Neither region can form starch even after sunlight exposure.

(4) The covered region develops more starch than the exposed region.

45. Two plants of the same species are grown under identical conditions, except Plant A receives sufficient light and Plant B receives very little light. After several days, Plant B becomes pale and weak. What is the best explanation?

(1) Plant B cannot absorb water in low light.

(2) Plant A cannot respire because it receives sunlight.

(3) Reduced light limits photosynthesis, and chlorophyll development may also be affected.

(4) Plant B produces more food because it uses less sunlight.

PART – 4 : MATHEMATICS

Single Correct MCQ • Q. 46 – 65 • Maximum Marks : 80

46. If $\sqrt{1+\frac{27}{169}} = 1+\frac{x}{13}$ then x =

(1) 14 (2) 1 (3) None of these (4) Cannot be determined

47. A can do a piece of work in 14 days and B is 40% more efficient than A. In how many days can B finish it?

(1) 10 days (2) $7\frac{1}{2}$ days (3) $5\frac{1}{4}$ days (4) $5\frac{3}{5}$ days

48. The value of $\frac{(0.31)^3-(0.21)^3}{0.0961+0.0651+0.0441}$ is :

(1) 0.2 (2) 0.04 (3) 0.1 (4) 0

49. The value of $\left(3^{-1}+4^{-1}\right)^{-1} \div 5^{-1}$ is :

(1) $\frac{7}{10}$ (2) $\frac{60}{7}$ (3) $\frac{7}{5}$ (4) $\frac{7}{15}$

50. Simplify $2^{-7} \times (2^5 \div 2^9)$ and write the answer in exponent form:

(1) $\frac{1}{2^9}$ (2) $\frac{1}{2^5}$ (3) $\frac{1}{2^{11}}$ (4) 2^{11}

51. What will be the unit digit of the cube of a number ending with 2?

(1) 8 (2) 4 (3) 2 (4) 6

52. A can do a piece of work in 25 days, which B alone can do in 20 days. A started the work and was joined by B after 10 days. The work lasted for:

(1) $12\frac{1}{2}$ days (2) 15 days (3) $16\frac{2}{3}$ days (4) 10 days

53. Which of the following statements is true?

(1) Natural numbers are closed under multiplication

(2) Whole numbers are not closed under multiplication

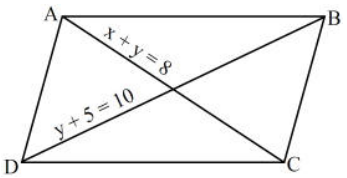

(3) Integers are not closed under multiplication

(4) Rational numbers are not closed under multiplication

54. If a number abc is divided by 5 it leaves a remainder 2. Then which digit is at the units place?

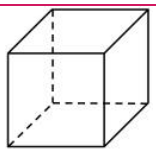

(1) 5 or 2 (2) 2 or 0 (3) Only 2 (4) 2 or 7

55. ABCD is a parallelogram as shown. Find x and y.

(1) 1, 7 (2) 2, 6 (3) 3, 5 (4) 4, 4

56. The name of the shape is :

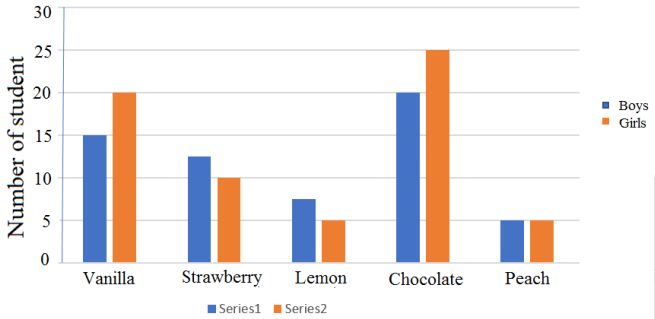

(1) Cuboid (2) Cube (3) Square (4) Cylinder

57. If n is the number of sides, then the number of diagonals of a polygon is:

(1) $\frac{n(n-3)}{2}$ (2) $\frac{n(n-3)}{3}$ (3) $\frac{n}{3}$ (4) $\frac{n^2}{2}$

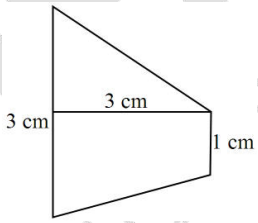

58. Refer the green graph and answer the following question:

A survey was conducted in a class to see how many girls and boys like a particular ice cream flavour. Find the total number of boys that like the flavour Vanilla, Strawberry and Lemon together?

(1) 38 (2) 35 (3) 30 (4) 29

59. The area of the trapezium is:

(1) $6cm^2$ (2) $4cm^2$ (3) $3cm^2$ (4) $9cm^2$

60. If the sum of three consecutive even numbers is 234, then the smallest among them is:

(1) 76 (2) 80 (3) 78 (4) None

61. The factorisation of 5x - 20 is:

(1) 5(x - 5) (2) 5(x - 3) (3) 5(x - 4) (4) 5(x - 20)

62. What is the area of the largest triangle that can be fitted into a rectangle of length ℓ units and width w units?

(1) $\frac{\ell w}{2}$ (2) $\frac{\ell w}{3}$ (3) $\frac{\ell w}{6}$ (4) $\frac{\ell w}{4}$

63. From a well-shuffled deck of 52 cards, one card is drawn at random. What is the probability that the drawn card is a black 6?

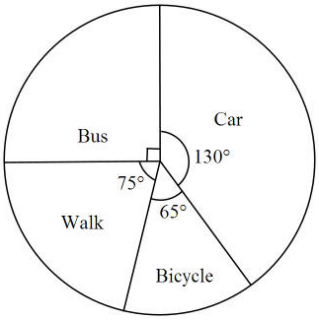

(1) $\frac{3}{26}$ (2) $\frac{1}{26}$ (3) $\frac{1}{13}$ (4) $\frac{1}{52}$

64. The factorisation of $x^2y^2 + xy + xy^2z + yz + x^2yz + xz$ is:

(1) (xy + yz + zx) (xy + 1) (2) (xy + yz + zx) (yz + 1)

(3) (xy + yz + zx) (zx + 1) (4) None of these

65. The pie chart shows 2400 people using different mode to travel to office. The numbers of people going to office by walking are:

(1) 500 (2) 550 (3) 1850 (4) 1800

PART – 5 : MENTAL ABILITY

Single Correct MCQ • Q. 66 – 85 • Maximum Marks : 80

66. Choose the word that completes the second pair, in the same way as the first pair.

Bow : : Arrow : : Pistol : ?

(1) Bullet (2) Gun (3) Shoot (4) Rifle

67. DI is related to 49, in the same way as FD is related to:

(1) 64 (2) 73 (3) 32 (4) 81

68. Blocked is related to YOLXPVW, in the same way as OZFMXS is related to:

(1) LABOUR (2) LAUNCH (3) NAUGHT (4) RESULT

69. What comes in place of question mark (?) in the series given below?

LMD, MKG, NIJ,?

(1) PKM (2) MGO (3) LGM (4) OGM

70. Find the missing term in the following series.

0, 4, 18, 48,?, 180

(1) 100 (2) 191 (3) 152 (4) 110

Directions (Q. 71 & 72): Choose the word which is different from others.

71. (1) Square (2) Triangle (3) Rectangle (4) Circle

72. (1) Mile (2) Centimeter (3) Litre (4) Yard

73. How many such pairs of letters are there in the word 'CHANNEL', which has as many letters between them in the word as in the English alphabet? (Pairs of identical letters are not counted.)

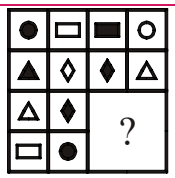

(1) None (2) One (3) Two (4) Three

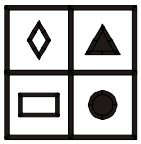

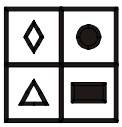

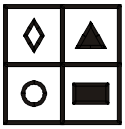

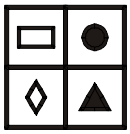

74. In the following question arrange the given words as per order in the dictionary.

(I) Ambitious, (II) Ambiguous, (III) Ambiguity, (IV) Animation, (V) Animals

(1) III, II, IV, I, V (2) III, II, V, IV, I (3) III, II, I,V, IV (4) III, II, IV, V, I

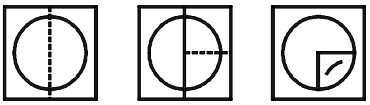

75. In each of the following problems, select a figure from the given four alternatives, which when placed in the blank space of problem figure would complete the pattern.

(1) 
(2) 
(3) 
(4) 

76. In the following question, three figures (X), (Y) and (Z) showing a sequence of folding a paper are given. The figure depicts the cut made on the folded paper. Select the answer from the alternatives, which would most closely resemble the third figure, when it is unfolded.

Question figure:

(X) (Y) (Z)

(1) 
(2) 
(3) 
(4) 

77. If 'white' is called 'blue', 'blue' is called 'red', 'red' is called 'yellow', 'yellow' is called 'green', 'green' is called 'black', 'black' is called 'violet' and 'violet' is called 'orange', then what would be the colour of human blood?

(1) Red (2) Green (3) Yellow (4) Violet

78. If '×' stands for '+', '<' stands for '–', '>' stands for '×', '+' stands for '÷', '–' stands for '=', '÷' stands for '>' and '=' stands for '<', then which of the given equations is correct?

(1) 8 < 4 × 3 – 3 × 2 × 1 (2) 8 > 4 < 3 – 3 > 2 < 1

(3) 8 + 4 < 3 ÷ 3 < 2 < 1 (4) 8 + 4 × 3 = 3 > 2 × 1

79. The number in each row or column of the square are written according to the same rule. By identifying the rule, find the missing number.

5	8	7
11	17	15
21	33	?

(1) 22 (2) 29 (3) 39 (4) 28

80. Raja walks slower than Raghu and Raghu walks as fast as Goru and Krishna walks faster than Goru. Who walks the fastest?

(1) Raghu (2) Raja (3) Krishna (4) Both Raghu and Goru

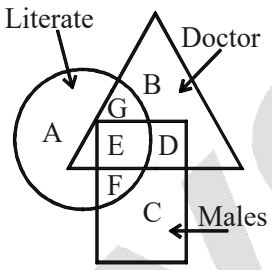

81. Pointing to a gentleman, Deepak said, "His only brother is the father of my daughter's father". How is the gentleman related to Deepak?

(1) Grandfather (2) Father (3) Brother-in-law (4) Uncle

82. Shalini is standing at the South-East corner of a rectangular field. She starts crossing the field diagonally. After walking half the distance, she turns right, walks some distance and turns left. Which direction is Shalini facing now?

(1) South-East (2) South-West (3) North-East (4) North-West

Directions (Q. 83 & 84): Study the following diagram to answer these questions.

83. Which part shows Literate Males, who are Doctors?

(1) G (2) E (3) D (4) F

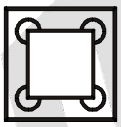

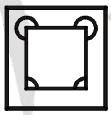

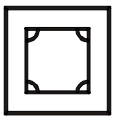

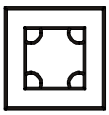

84. Which part shows males, who are neither Doctor nor Literate?

(1) A (2) B (3) C (4) D

85. Complete the second pair in the same way as the first pair.

Problem figure

(1)  (2)  (3)  (4) 

ANSWER KEY

SAMPLE PAPER 2026 · CLASS 8TH → 9TH

85
QUESTIONS · 340 MARKS

Single-correct objective. The numbers in brackets are the option numbers (1)–(4) printed in the question paper.

PART 1 · PHYSICS

Q. 1 – 15 · 60 marks

1	(4)	2	(4)	3	(2)	4	(1)	5	(2)
6	(2)	7	(1)	8	(3)	9	(1)	10	(2)
11	(1)	12	(3)	13	(4)	14	(4)	15	(3)

PART 2 · CHEMISTRY

Q. 16 – 30 · 60 marks

16	(2)	17	(2)	18	(3)	19	(2)	20	(4)
21	(2)	22	(1)	23	(1)	24	(1)	25	(1)
26	(1)	27	(2)	28	(2)	29	(4)	30	(4)

PART 3 · BIOLOGY

Q. 31 – 45 · 60 marks

31	(1)	32	(3)	33	(4)	34	(2)	35	(1)
36	(4)	37	(2)	38	(3)	39	(1)	40	(4)
41	(2)	42	(3)	43	(4)	44	(1)	45	(3)

PART 4 · MATHEMATICS

Q. 46 – 65 · 80 marks

OLYMPIADS · 2026

Olympiad results

TOP ACHIEVEMENT · CHEMISTRY

Qualified the Chemistry Olympiad twice, and selected for the HBCSE camp.

Saksham Bishnoi reached the national stage of the Chemistry Olympiad in two consecutive years and was selected for the Orientation-cum-Selection Camp at HBCSE, Mumbai. 4 Years Classroom - the same student who took AIR 168 in JEE Advanced 2026.

Qualified twice | HBCSE selection camp | Only student from Faridabad

Above MAS means above the **Minimum Admissible Score**: clearing it puts a student in the national band for their subject. It is a real threshold, not a participation marker.

OLYMPIADS WE PREPARE STUDENTS FOR

NSEP	NSEC	NSEB	NSEA	IOQM	NSEJS
Physics	Chemistry	Biology	Astronomy	Mathematics	Class X and below

The olympiad pathway starts in Class 8.

NSEJS is open to Class 10 and below - the habit of staying with one hard problem is the one JEE Advanced rewards.
